

Restore Mechanical Performance & Building Wellness

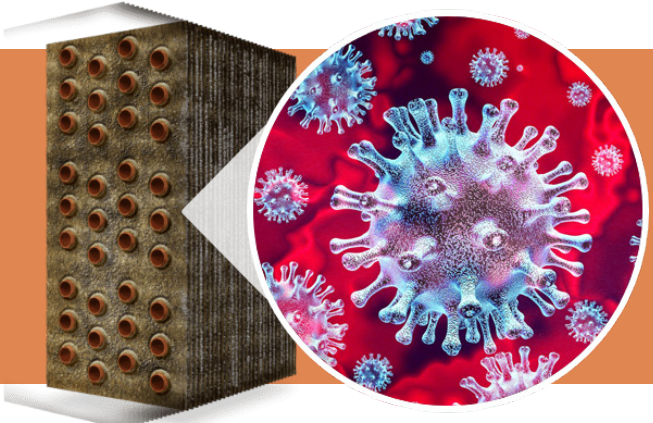

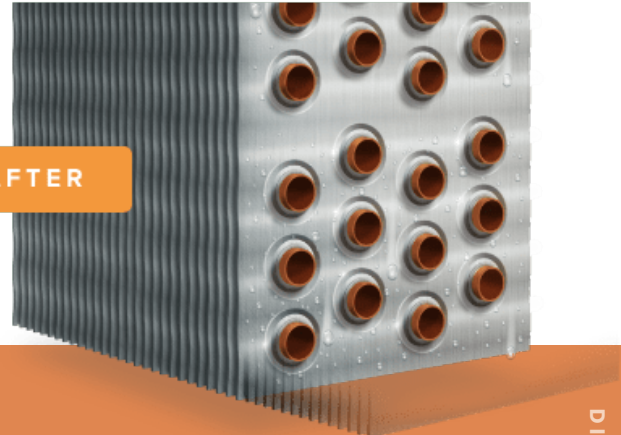

Zero-Chemical Solution to Remove Pathogens

We restore all HVAC equipment to perform like-new, by removing a colony of biofilm pathogens, responsible for increasing energy costs and contributing to infectious indoor environments where we live, work and play.

BEFORE

AFTER

According to The National Institute of Health,

“over 80% of infections are associated with Biofilm.”

DID YOU KNOW

Why SmartScrub Your Building Assets?

With a combination of high-performance sanitization methods and 100% plant-based technologies, specifically designed for HVAC equipment, we'll help you:

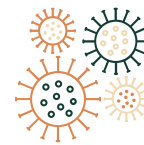

Save Money

Reduce utility bills by 15% on avg. with a payback in under 9 months

Increase Asset Lifespan

Restore equipment to extend lifespan by 3 - 5 years and avoid CapEx replacement costs

Mitigate COVID-19

Remove biofilm and help mitigate the spread of respiratory viruses

Together, We Can Fight COVID-19 (and Save Money)

To learn more about how we can help you eliminate the pathogens growing inside your HVAC systems, save money and possibly save lives, visit SmartScrub.ca
