

Restore Mechanical Performance & Building Wellness

Our clients typically experience an immediate reduction of their utility bills by 15%, with an average ROI of 9 months.

BEFORE

AFTER

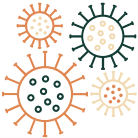

We restore HVAC equipment to perform like-new by removing harmful pathogens responsible for increasing energy costs and infectious indoor environments.

WHAT WE DO

Why SmartScrub Your Building?

With a combination of high-performance sanitization methods and 100% plant-based technologies specifically designed for HVAC equipment, we'll help you:

Mitigate Pathogens
Optimize performance and mitigate the spread of respiratory viruses.

Increase Asset Lifespan
Extend lifespan by 3 - 5 years and avoid CapEx replacement costs.

Save on Energy
Reduce utility bills by 15% with an average ROI of 9 months.

Together, We Can Fight COVID-19 (And Save Energy)
